

Tow and Carry with MAXXRAXX Measurement Chart

Please note: Dimensions marked are for the Voyager. Increase the measurements above by 250mm for the Explorer version and 150mm for the Pioneer version.

The MAXXRAXX tow and carry measurement chart is meant as a guide only, due to the great range of variables in vehicles, towbars, trailers and caravans each individual circumstance should be investigated thoroughly by the customer.

To prevent any potential damage to bikes it is the user's responsibility to ensure that there is enough space for the bicycles between vehicle and caravan/trailer regarding the clearance required when driving or reversing on full lock.
